Rahul Jaggi

Immediate Joiner | Senior Full Stack Engineer | Technical Leader |
React.js | Next.js | Node.js | React Native | System Design | SaaS |
AI | 13+ Years

Gurugram, Haryana, India

Summary

Senior Full Stack Engineer and Technical Leader with 13+ years of experience designing, architecting, and delivering scalable enterprise SaaS applications, web platforms, mobile applications, and AI-powered solutions. I specialize in building high-performance, secure, and maintainable software that aligns technology with business objectives. My expertise spans the full software development lifecycle, with strong proficiency in React.js, Next.js, Node.js, NestJS, React Native, JavaScript, TypeScript, REST APIs, GraphQL, SQL/NoSQL databases, and modern frontend architecture. I have extensive experience developing scalable backend services, designing enterprise APIs, implementing authentication and authorization, optimizing application performance, and delivering responsive user experiences. In addition to hands-on engineering, I have successfully led technical initiatives, mentored engineering teams, conducted architecture reviews, established development best practices, and collaborated closely with Product, Design, QA, and DevOps teams to deliver high-quality software in Agile environments. I also have practical experience building AI-powered applications using Generative AI, Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), OpenAI APIs, and AI automation. My recent work includes developing intelligent features such as call transcription, conversation summarization, sentiment analysis, AI assistants, and workflow automation to enhance user experience and business productivity.

Core Competencies:

- Full Stack Development
- Technical Leadership & Team Mentoring
- System Design & Scalable Architecture
- Enterprise SaaS Product Development
- React.js, Next.js, Node.js, NestJS, React Native
- JavaScript, TypeScript
- REST APIs & GraphQL
- SQL & NoSQL Databases
- Cloud-Native Application Development
- Performance Optimization
- AI Integration, LLMs, Prompt Engineering, RAG, OpenAI APIs

I am passionate about building scalable products, solving complex

engineering challenges, improving development processes, and leading teams that deliver business value through technology. I am currently open to Senior Full Stack Engineer, Technical Lead, Staff Engineer, Engineering Manager, and Solution Architect opportunities. Immediate Joiner.

Experience

SingleInterface

11 years 4 months

Senior Technical Project Manager

April 2023 - Present (3 years 4 months)

Gurugram

Description: In my current role, I lead the end-to-end delivery of the Nova platform, directing cross-functional engineering teams of over 15 professionals. I drive Agile program execution through effective sprint planning, release governance, and stakeholder engagement, ensuring high-quality and timely product delivery. My focus on technology delivery management encompasses overseeing solutions across React, Node.js, NoSQL, and AWS ecosystems, ensuring scalability and operational excellence. Additionally, I lead AI-powered product innovation initiatives, leveraging OpenAI technologies to enhance customer engagement and operational efficiency.

Achievements: I have accelerated enterprise product delivery timelines by 25% through Agile transformation initiatives and improved engineering team productivity by 20% by establishing standardised delivery frameworks. Furthermore, I reduced production defects by 30% through enhanced quality assurance processes and increased sprint predictability by 35% through effective backlog prioritisation and risk management.

Senior Principal Software Engineer

April 2020 - March 2023 (3 years)

Gurugram

Description: In this role, I spearheaded the development and delivery of the Connect App using React Native, establishing a scalable mobile application architecture. I enhanced application performance and scalability by driving engineering optimizations and improving user experience. My influence on key

architectural decisions promoted standardized development methodologies and long-term platform maintainability.

Achievements: I successfully improved application scalability and stability, which significantly enhanced overall performance and user satisfaction.

Frontend Team Lead

April 2018 - March 2020 (2 years)

Description: As Frontend Team Lead, I was responsible for leading a team of frontend developers, ensuring high-quality code delivery and adherence to project timelines. I facilitated collaboration between teams and implemented best practices in frontend development to enhance product quality.

Achievements: I successfully led the team to meet project deadlines while maintaining high standards of code quality and performance.

Senior Frontend Developer

April 2015 - March 2018 (3 years)

Description: In this role, I contributed to the development of various frontend applications, focusing on user experience and performance optimization. I collaborated with cross-functional teams to deliver high-quality software solutions.

Achievements: I played a key role in enhancing application performance and user engagement through effective frontend development practices.

Parangat Technologies

Frontend Developer

November 2014 - April 2015 (6 months)

Noida

Description: As a UI Developer, I was involved in designing and implementing user interfaces for web applications, ensuring a seamless user experience. I collaborated with designers and backend developers to create responsive and visually appealing applications.

Achievements: I successfully delivered multiple projects on time, contributing to improved user satisfaction and engagement.

Rosensoft Technologies

Frontend Developer

October 2013 - September 2014 (1 year)

Noida

Description: In this position, I focused on developing frontend components for web applications, working closely with the design team to implement user-friendly interfaces.

Achievements: I contributed to the successful launch of several web applications, enhancing user experience and functionality.

Magic Software Inc.

Frontend Developer

February 2013 - October 2013 (9 months)

Noida Area, India

Description: As a Frontend Developer, I was responsible for creating and maintaining user interfaces for various software applications, ensuring high performance and responsiveness.

Achievements: I played a significant role in improving application usability and performance through effective frontend development techniques.

Education

Annamalai University

Master of Computer Applications, Information Technology · (April 2016 - June 2018)

Annamalai University

Bachelor of Technology, COMPUTER AND INFORMATION SCIENCES AND SUPPORT SERVICES · (2012 - 2015)

Annamalai University

Bachelor of Science, Information Technology
